Dedicated Full Stack Developer seeking to leverage skills in modern frameworks to build impactful applications and solve complex challenges in a dynamic work environment.

EXPERIENCE

AI Intern

Ethiopian Artificial Intelligence Institute

March 2025 - July 2025

- Developed an Amharic OCR system using machine learning techniques for text extraction from images.
- Collaborated with a team to improve model accuracy and performance through iterative testing.
- Documented project progress and methodologies for future reference and knowledge sharing.
- Presented findings to stakeholders, demonstrating the application's potential impact.

Frontend Developer Intern

Tina Mart - E-commerce Development Team

February 2025 - Present

- Designed responsive interfaces using Vue.js and Tailwind CSS for user engagement.
- Integrated RESTful APIs to enhance e-commerce functionality and user experience.
- Collaborated with designers to implement visual concepts aligned with brand identity.
- Conducted usability testing to optimize application for end-users.

EDUCATION

BSc in Software Engineering

Bahir Dar University

Expected to graduate in 2026

PROJECTS

LANET Mobile App

Language Learning Platform

A platform for learning Ethiopian languages

AVS Startup Hub Management System

A centralized web platform managing startup applications and partnerships effectively.

Food Recipe Platform

A platform for browsing, sharing, and managing recipes with filtering, ratings, and comments

Amharic OCR System

A deep learning-based system for recognizing Amharic text from images.
